# "Grown by Lupton"

---

Since 1886  
Producers of High Grade Biennial  
Vegetable Seeds to the Wholesale Trade

---

## CONTRACT PRICE LIST

---

Grown in various producing sections exclusively by ourselves from planting stocks bred on our Long Island farms and annually replaced from that source, we believe our products to represent the highest value obtainable. While we do not economize in any factor which may be essential to the production of high class seeds, by limiting our activities to comparatively few kinds and varieties we try to maintain a high efficiency, and the fact that we still have as customers seedsmen who have for two generations depended on us to supply them is our most eloquent compliment.

Recently the production of vegetables has become more and more a function of the professional farmer and gardener and less an amusement of the back yard amateur. The professional is not only a more efficient producer but a far more critical judge of the seeds he plants. Since we began this work on Long Island many years ago we have had constantly in mind the needs of the man who must make his living from his vegetable crop, and we invite you to test our products yourself and to have your most critical and intelligent customers test them, in comparison with any others.

Our prices are based on actual costs of production rather than on competitive conditions, if some items seem low it is because we are able to produce at the price, if some seem high it is that we feel that seed of such quality as we should care to send out under our tag and label cannot be grown for less.

J. M. LUPTON & SON, Inc.  
Mattituck, Long Island, N. Y., U. S. A.

## TURNIP

Items on this page are grown in the West from our eastern bred planting stock and offered F. O. B. our warehouse, Mt. Vernon, Wn.

	<i>Quantity</i>	<i>Price</i>

<b>SWISS CHARD</b>		
GREEN LYON—An excellent strain of a vegetable becoming rapidly more popular . . . . .	-----	.20

## CABBAGE WESTERN GROWN

Our western grown cabbage is produced by ourselves in the State of Washington from the same stock seeds used in planting our Long Island crop, replaced annually from our Long Island breeding farm and is a very high class product. It represents the finest possible stock for the merchant who desires a first quality product at a reasonably competitive price.

Sold F. O. B. our warehouse at Mt. Vernon, Wn.

	<i>Quantity</i>	<i>Price</i>
EXTRA EARLY JERSEY		
WAKEFIELD . . . . .		.75
EARLY JERSEY WAKEFIELD		
We have been breeding the Wakefield sorts and the Flat Dutch types for some 40 years. Our production of them is large and we are very confident as to their quality . . . . .		.75
GOLDEN ACRE—A uniform, small, early Copenhagen type grown from stock seed supplied by Thos. Madsen & Co., originators . . . . .		1.50
CHARLESTON WAKEFIELD. . . . .		.75
COPENHAGEN MARKET—An exceptionally uniform strain of this variety . . . . .		.90
All HEAD EARLY—Originally selected on our Long Island farm and continuously bred from the same stock since that time . . . . .		.75
SUCCESSION—Similar to All Head Early, slightly more foliage . . . . .		.75
EARLY SUMMER—A conspicuously light blue color, heads rounded . . . . .		.75
GLORY OF ENKHUIZEN—A rounded head Dutch sort. Our strain is exceptionally fine . . . . .		.75
EARLY WINNINGSTADT — A sharp pointed head of good weight, not so early as the Wakefields . . . . .		.75

# Western grown Cabbage—Continued

	Quantity	Price
STEIN'S FLAT DUTCH—Our introduction, has become extremely popular displacing the later sorts to a large extent . . . . .	-----	.75
HOLMES HOUSER—used by growers in Pennsylvania and Ohio . . . . .	-----	.75
ALL SEASONS—Frequently confused with Succession to which it is in no way related. An excellent main crop variety . . . . .	-----	.75
LARGE LATE DRUMHEAD . . . . .	-----	.75
SUREHEAD—The original strain-----	-----	.75
LOUISVILLE DRUMHEAD — Our strain of this variety is frequently sold in the South under the name of Florida Header . . . . .	-----	.75
VOLGA—A rather remarkable Russian cabbage of peculiar type, hard heading and sure to produce a crop under difficult conditions . . . . .	-----	.75
PREMIUM LATE FLAT DUTCH-----	-----	.75
SHORT STEM DANISH BALL HEAD		
We have recently done extensive breeding work in this variety. We believe our strain of it to be exceptionally fine and it has given excellent results in the hands of professional growers . . . . .	-----	.90
PENN STATE BALL HEAD—A variety developed by the Division of Plant Breeding of Pennsylvania State College and Experiment Station, grown by us from stock seed supplied by the college. A large, somewhat flattened form of the ball head producing probably the largest tonnage per acre of any known variety of cabbage. Our exclusive production. -----	-----	3.00

## Western grown Cabbage—Continued

	<i>Quantity</i>	<i>Price</i>
LUPTON FLAT SAVOY . . . . .	-----	1.00

### LUPTON ROCK RED

The above two sorts we believe to be the finest of their kind and believe that they are the only Savoy and Red cabbage necessary for general purposes. Bred originally for fine market garden trade they are far superior to the average stocks of these sorts . . . . . 1.00

## LONG ISLAND GROWN CABBAGE

Famous throughout the seed trade for 75 years our Long Island grown cabbage seed is still the finest product possible to obtain. No serious competition at equal prices has ever threatened its position. This is due we believe to three factors, first a peculiar climatic and soil condition causing considerable natural selection by the loss of many weaker plants, second the very high character of the farmers engaged, many of whom have grown seed for us for several generations, and third the ability and resourcefulness of those who many years ago built up the business.

Sold F. O. B. Mattituck, and guaranteed to be of genuine Long Island production, we offer

	<i>Quantity</i>	<i>Price</i>
EXTRA EARLY JERSEY		
WAKEFIELD . . . . .	-----	1.50
EARLY JERSEY WAKEFIELD-----		1.50

SUREHEAD . . . . .	-----	1.50
PREMIUM LATE FLAT DUTCH-----		1.50
SHORT STEM BALLHEAD . . . . .	-----	2.00
LUPTON FLAT SAVOY . . . . .	-----	2.00
LUPTON ROCK RED . . . . .	-----	2.00

## Yellows Resistant Cabbages

We believe that the use of the yellows resistant strain of cabbage will gradually become more and more in demand as the cabbage districts of the Middle West and South are rapidly becoming infested with this disease. We certainly urge all seedsmen supplying these sections to catalogue and feature them. We expect to maintain production and to continue to offer them at a reasonable price. We do not however recommend their use in sections where absence of the disease makes it unnecessary as we have other strains of cabbage more uniform and true to type.

*Quantity    Price*

**IACOPE**—A new Yellows Resistant strain of Copenhagen Market. A product of ten years' breeding by the Iowa Agricultural Experiment Station. This is the first and only strain of early cabbage on the market that is resistant to the yellows disease. We have the exclusive production of this new strain.

Western grown . . . . .	2.00
Long Island grown. . . . .	4.00

**WISCONSIN HOLLANDER** or No. 8—A ballhead type cabbage grown in yellows infested sections as a market and storage variety.

Western grown . . . . .	1.00
Long Island grown . . . . .	2.00

**BUGNER**—A ball head sort used largely in the vicinity of Chicago

Western grown . . . . .	1.00
Long Island grown . . . . .	2.00

**WISCONSIN ALL SEASONS**—Used generally as a Kraut and earlier market sort.

Western grown . . . . .	1.00
Long Island grown . . . . .	2.00

## SPINACH

In Western New York State we grow some very high quality strains of Spinach including the Virginia Blight Resistant. We can ordinarily make shipment from the growing station in time for the fall sowing in middle southern states.

Sold F. O. B. Bergen, N. Y.

Shipment as early as August 15th.

	<i>Quantity</i>	<i>Price</i>
VIRGINIA BLIGHT RESISTANT-----		.23
BLOOMSDALE SAVOY . . . . .		.23
LATE SEEDING . . . . .		.23

## BRUSSELS SPROUTS

The Brussels Sprout, a delicious vegetable coming more and more into use, has been difficult to grow successfully in this country until recently. Now the Long Island commercial growers have bred a strain which is giving wonderful success wherever tried. Bred to a high degree of uniformity and productivity we believe this to be the only strain that should be offered in this country.

	<i>Quantity</i>	<i>Price</i>
LONG ISLAND IMPROVED		
Western grown . . . . .		1.50
Long Island grown . . . . .		5.00

## KALE

### BLUE CURLED SIBERIAN

More curled than most strains  
and of a healthier color and  
growth, will withstand zero  
weather

Western grown . . . . .	.20
Long Island grown . . . . .	.35

### DWARF CURLED SCOTCH

A densely curled low growing  
green curled Kale, always  
admired

Western grown . . . . .	.40
-------------------------	-----

BLUE CURLED SCOTCH—A distinctly blue close curled Scotch strain in large demand in the Norfolk, Va., section on account of its deep color and excellent shipping qualities.

Western grown . . . . .	.40
-------------------------	-----

## "GROWN BY LUPTON"

---

J. M. Lupton & Son, Inc. are seed growers only. We do not handle the products of other growers and shipments received from us may be assumed to be the product of our own re-selected and tested planting stocks unless specially arranged.

In advance of the planting season, or before May 1, of each year we are prepared to produce crops from special stocks if desired, to keep these separate, and give them the same thorough care and superintendence that we give our own stocks.

All of our products listed are grown exclusively by ourselves. We do not make plantings through other seed growers.

We take pleasure in inviting anyone commercially or otherwise interested in vegetable seed production to visit our breeding farm and office on Long Island or our growing fields in Washington State.

Our contract terms to firms of approved credit are 2% 10, net 60 days, package at cost, F. O. B. growing station.

Cabbage, Turnip and Kale are usually ready for shipment in August of each year, Beet about Oct. 1.

We, J. M. Lupton & Son, Inc., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds we send out, and we will not be in any way responsible for the crop.

J. M. LUPTON & SON INC.

## CHARLESTON WAKEFIELD

*We are generally in a position to furnish accurate type photographs of our products for catalogue use.*

## EARLY WONDER
